

# TUSHAR GUPTA

SOFTWARE DEVELOPER / FULL STACK DEVELOPER

To

Whom so ever it may concern

Respected Sir/Ma'am,

I am a last-semester graduate student of Bachelor of Computer Applications from the Institute of Information Technology & Management, expected to graduate in 2024. I am extremely interested in job opportunities related to the field of development/coding.

Throughout my academic journey, I have focused on building my analytical and logical abilities, which helped me develop proficiency in various technologies and tools. I have gained extensive knowledge and certifications in Java, React, Bootstrap, MySQL, MSSQL, MongoDB, Python, and more. My academic projects, such as developing Project Tracking Software and the Call for Proposals system, allowed me to apply these skills practically, enhancing my expertise in full-stack development and database management.

Additionally, I have completed internships that provided valuable hands-on experience. As a Software Developer Intern at CDAC Jasola Vihar, I worked as a full-stack developer, managing core projects and integrating external tools for enhanced system functionality. My role as a Technical Executive for Clique Events involved contributing to the planning and execution of large-scale events, which honed my organizational and collaborative skills.

I am detail-oriented, meticulous, and a problem-solver when managing priorities within tight deadlines. After reviewing the key qualifications for the roles I am interested in, I am confident and well-prepared to be a valuable contributor. Please review my resume for additional insights into my background. Thank you for your time and consideration.

Sincerely,

Tushar Gupta
